<b>1</b>	<b>Class 2: Conditional Statements</b>	<b>2</b>
1.1	If & else . . . . .	2
1.2	Switch . . . . .	4

## 1 Class 2: Conditional Statements

Condition এর জন্য 4 ধরনের Conditional statement আছে-

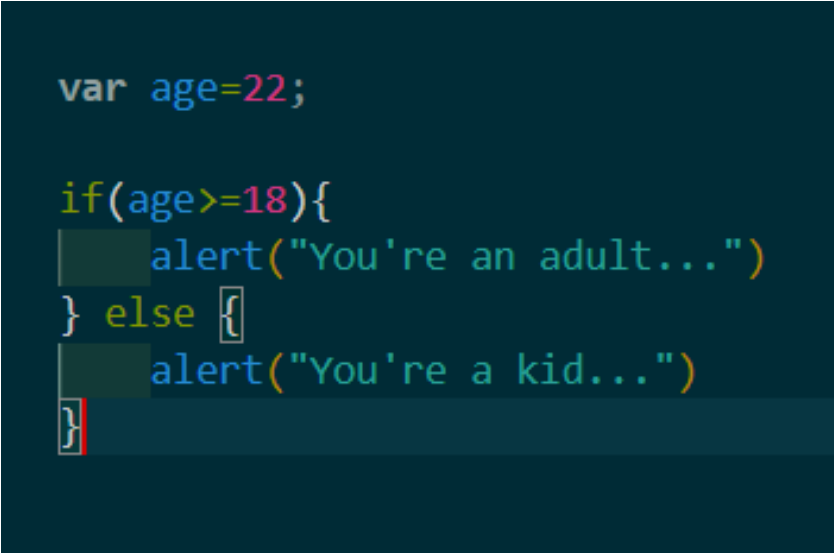

- **if** -> **true** condition
- **else** -> **false** condition
- **else if** -> previous condition is not true
- **switch** -> নির্দিষ্ট অনেক **alternative blocks**

### 1.1 If & else

- Syntax

```
if (condition) {  
    // block of code to be executed if the condition is true  
} else {  
    // block of code to be executed if the condition is false  
}
```

- Example & Output

```
var age=22;  
  
if(age>=18){  
    alert("You're an adult...")  
} else {  
    alert("You're a kid...")  
}
```

Figure 1: **if** example

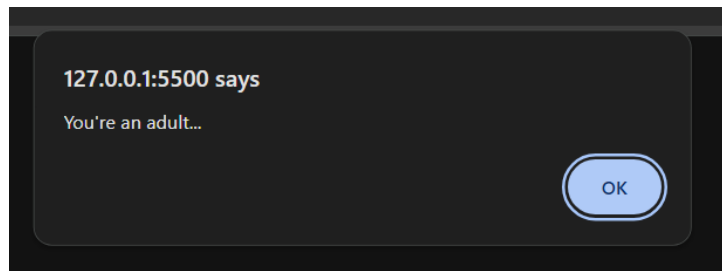

Figure 2: **if** output

```
var age=2;  
  
if(age>=18){  
    alert("You're an adult...")  
} else {  
    alert("You're a kid...")  
}
```

Figure 3: **else** example

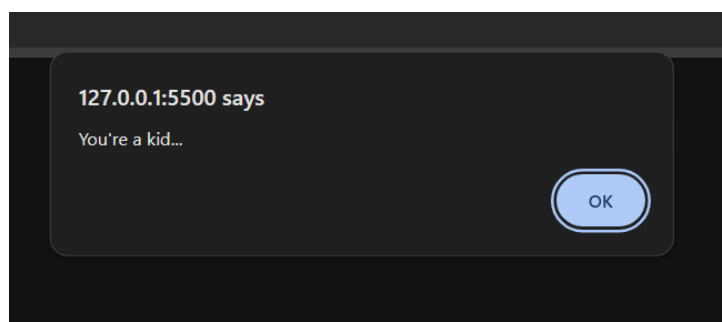

Figure 4: **else** output

## 1.2 Switch

- Syntax

```
switch(expression) {  
  case 1:  
    // code block  
    break;  
  
  case 2:  
    // code block  
    break;  
  
  //... can add more cases  
  
  default:  
    // code block  
}
```

- **break:** যেকোনো case মিলে গেলে পুরো loop থেকে বের করে দিবে
- **default:** কোনো case-ই না মিললে এর ভিতরের code execute হবে

- Example & Output

```
var age = 22;

switch (true) {
  case (age >= 0 && age <= 1):
    alert("You're an Infant...");
    break;
  case (age > 1 && age <= 4):
    alert("You're a Toddler...");
    break;
  case (age > 4 && age <= 12):
    alert("You're a Child...");
    break;
  case (age > 12 && age <= 19):
    alert("You're a Teen...");
    break;
  case (age > 19 && age <= 39):
    alert("You're an Adult...");
    break;
  case (age > 39 && age <= 59):
    alert("You're a Middle Age Adult...");
    break;
  case (age >= 60):
    alert("You're a Senior Adult...");
    break;
  default:
    alert("Please enter a valid AGE...");
}
```

Figure 5: **switch-case** execute example

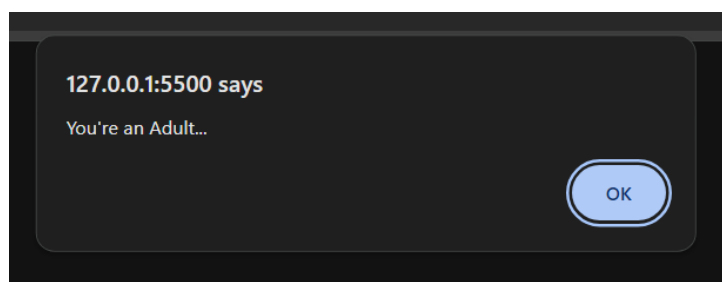

Figure 6: **switch-case** execute output

```
var age = -22;

switch (true) {
  case (age >= 0 && age <= 1):
    alert("You're an Infant...");
    break;
  case (age > 1 && age <= 4):
    alert("You're a Toddler...");
    break;
  case (age > 4 && age <= 12):
    alert("You're a Child...");
    break;
  case (age > 12 && age <= 19):
    alert("You're a Teen...");
    break;
  case (age > 19 && age <= 39):
    alert("You're an Adult...");
    break;
  case (age > 39 && age <= 59):
    alert("You're a Middle Age Adult...");
    break;
  case (age >= 60):
    alert("You're a Senior Adult...");
    break;
  default:
    alert("Please enter a valid AGE...");
}
```
